Javee 800 Javelin Trainer

The Javee was designed as a training aid for javelin throwers that allows them to duplicate the motion and technique incorporated in throwing a javelin. The elastic cords allow the thrower to vary the amount of resistance. The use of elastic cords allows the athlete to practice the javelin throw while reducing the chance of muscle/tendon injuries. Grip diameter of the Javee is the actual diameter of a 800 or 600 gram javelin for most realistic feel.

Double Man Overspeed Trainer
This overspeed training device is the safest overspeed trainer you will find. By attaching this device to 2 runners you can overspeed the runner in back with comfort and security. The back runner allows the front runner to stretch the elastic up to 3 times its length. This then allows the back runner to be pulled forward with the help of the elastic. 20' safety sleeve elastic with 2 swivel belts and stretches to 60'.
STDOT UPS 6 lbs.

Single Man Overspeed Trainer
Single person overspeed training device. Athlete is attached to anchor and the anchor is attached to a secure object. In order to create resistance the athlete prepares by moving away from the point of anchor. The added resistance pulls the athlete faster forcing the athlete's stride to lengthen and pace to quicken. After the overspeed training device has performed its role, the athlete pulls the quick release strap, and the device separates from him/her. The athlete then tries to maintain that speed and stride beyond the point of anchor. This trainer is 30' long and stretches to 90'.
STSOT UPS 7 lbs.

"Safety Sleeve"
The "Safety Sleeve" technology system is used on our overspeed training aids for safety and performance. The elastic cord is encased in a heavy webbing to ensure a safe workout. You will find this system on the following products: **STDOT, STSOT, STA105, and STA150.**

Accelerator 105
Great for keeping athletes low out of the start. Perfect acceleration training aid. The 10' safety sleeve elastic can stretch to 30'. Works both forward and backward. Comes in either 105 to 149 lbs. or 150 lbs. and up. Includes Slastix, one universal harness, and one anchor. Ideal for all athletes.

STA105 105-149 UPS 5 lbs.
STA150 150 and up UPS 5 lbs.

Resistance Trainer
Simply attach handle/strap assembly to shoulder harness and hold on. This allows the runner the most realistic resistance while running. 10' long strap with no pinch 10" handle connected by durable clip to a universal, fully adjustable padded shoulder harness.
STRT UPS 1 lb.

Tandem Tow
This training aid allows both athletes to run together. Back runner holds back front runner. Athletes can at any time quickly spin around and switch roles going back the other way. 10' long strap with large 3" wide loops at each end.

THE BEST LINERS FOR YOUR PURPOSE AND YOUR BUDGET.

All Stackhouse four-wheel liners (except LPFP50) use a heavy duty, 20 gauge steel body with an attractive powder coated blue finish. The liner body has been designed so that its wedge shape ensures a constant flow of chalk to the bottom of the liner. Our liner gut, which is driven by the liner wheels, has an auger at each end that forces the chalk into a six-bar expulsion wheel which ensures a consistent flow of chalk. A fingertip control allows you to adjust the

thickness of your line and control shut-off of chalk. The liners ride on rubber diamond-tread wheels that use steel hubs and bearings for minimum rolling resistance. The liners offer both a 2" and 4" line for baseball, football, and soccer fields. These features, combined with the 5 models we offer, allow you to pick the best liner for your purpose - within your budget.
